ning of each regular issue of the PCT Gazette.

(54) Title: STATIONARY HAVING BOTH SIDED STAMP

(57) Abstract: Disclosed herein is a stationery item having a two-sided stamp, each surface of which has a different pattern, thus arousing the curiosity of children, who are major consumers, thereby increasing the marketability. The stationery item having the two-sided stamp of the present invention includes a reduced-diameter member 5 which is provided on an end of the stationery item and has a pair of support cuts 7 and a pair of stopper cuts 11. The stationery item further includes a stamp holder 6 which has protrusions 8 rotatably inserted into the respective support cuts 7, and a stopper 9 disposed between the protrusions 8 such that the stopper 9 is positioned in one stopper cut 11. Stamps 12a and 12b having different patterns, respectively, are provided at upper and lower positions in the stamp holder 6. The stationery item further includes a stamp cap 4 locked to the reduced-diameter member 5.
